DETAILED ACTION

Election/Restrictions

1. Claims 5-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 6.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yuze (5,404,924) cited by applicant.

See the embodiment of Figure 4, col. 1 line 12 - col. 3 line 26, col. 3 lines 50-56, and col. 4 line 40 - col. 5 Table 2: steel cords alternating with organic fiber cords such as nylon cords, polyester cords, or vinylon cords. The close correspondence of cord materials and tire structure provide a reasonable basis for the examiner to infer that the Yuze spirally wound belt cords also

meet the claimed initial tension limitation; the burden therefore shifts to applicant to show that the claimed property is not inherent in the above structure (MPEP 2112, 2112.01). In any case, it would have been obvious to one of ordinary skill in the art to provide such an initial tension for the Yuze belt cords so that the belt can perform its tread reinforcing function. As to claim 3, nylon is an aliphatic polyamide.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adrienne C. Johnstone whose telephone number is (703)308-2059. The examiner can normally be reached on Monday-Friday, 10:00AM-6:30PM.
